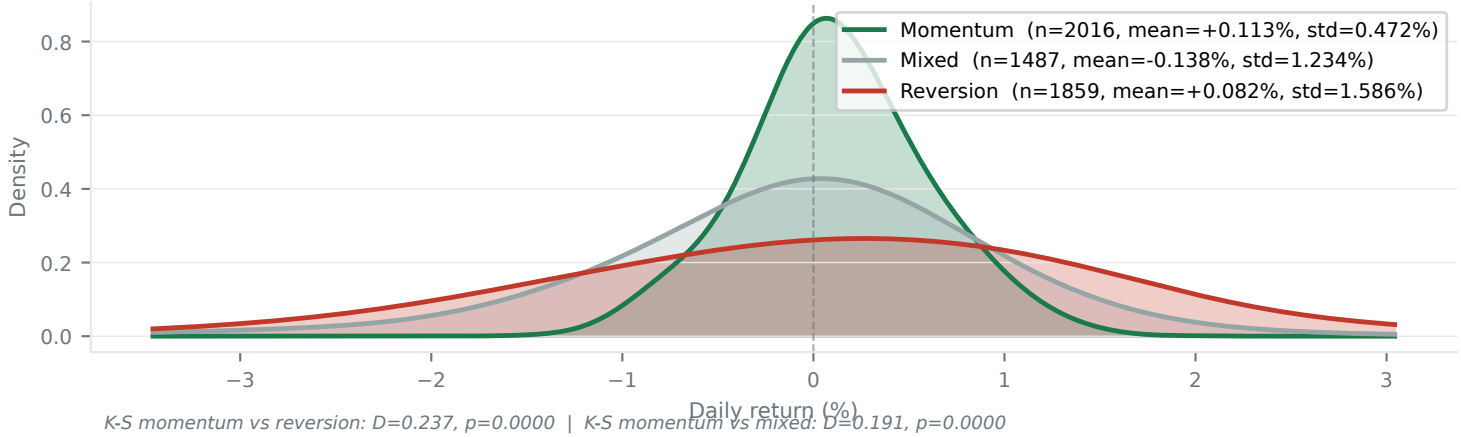
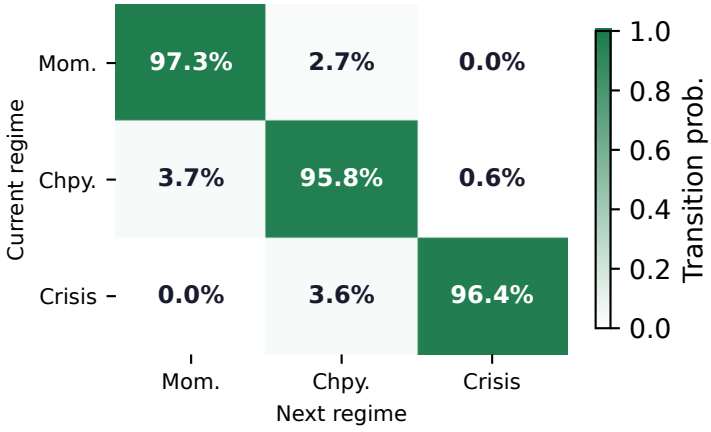
Regime Ensemble - Technical Report

Return Distributions by Regime (Kernel Density Estimate)



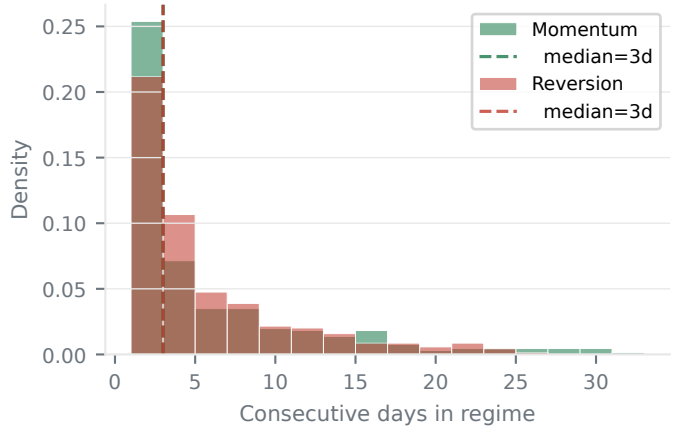
K-S momentum vs reversion: D=0.237, p=0.0000 | K-S momentum vs mixed: D=0.191, p=0.0000

Markov Transition Matrix



Diagonal = regime persistence. High diagonal = sticky regimes.

Regime Sojourn Time Distribution



Short sojourn -> fast flip -> higher turnover -> cost drag.

Ensemble Regime Label Timeline (momentum=+1, mixed=0, reversion=-1)
